Society for the Advancement of

No one can estimate too highly the advantages to be derived from a thorough knowledge of the resources of the country in which we live. To develop these to our pecuniary advantage, is the first object of all; and while we labor assiduously to enrich ourselves, we should never forget that we can add much to the pleasures of our avocation in life-whatever it may beby contributing to the advancement of Science. Not only does this keep us interested in the pursuit of our business, but it improves our mental and

We are led to make these remarks, in view of a suggestion made to us by a friend of Northern institutions, that the people of Lawrence should ety for the object named above—the general advancement of Science .-Such an institution as this would be patronized by similar institutions everywhere, because it would, in due course of time, afford a mutual benefit.

It was our good fortune to meet, on a Missouri steamboat, recently, the celebrated naturalist and geologist, Dr. HAYDEN. He was on his return from a six months tour through the Mauvaises Terres, or bad lands of Nebrasks, and had with him about five and there is no doubt, in our mind. that a scientific exploration of our own beautiful Territory, would unfold many specimens of fossils, minerals, triumph in the past. mammals, birds, insects and plants, which would enrich the cabinets of the halls of learning everywhere. Why cannot we have a society now, which will at once establish a cabinet

should not exist. made to establish in Lawrence a lit- tation of the slavery question in our erary society. No one doubted the own country, and the crisis which it utility of the effort, while all believed has brought upon Kansas. in its healthful influence upon our entire community. To build up, foster and sustain such a society, is the very best thing which the people of Lawrence can do; and when we reflect that such a society can be made permanent, and of value to us in the future, with very little more of trouble and no more cost, it would seem like folly

to let the advantage pass unimproved. instruments for its use. Dr. HENRY. the Secretary of the Smithsonian Institute, at Washington, has promised to place in our possession, at as early a period as possible, a barometer, therone of meteorology, into their care.
